

LEAK FREE SHOWER ENCLOSURES

ABOUT US

Envirotec Bathing is based in Shafton, Barnsley. Our state-of-the-art warehouse is capable of nationwide and international deliveries with rapid response.

We were set up after years of development, following ongoing issues in the market-place with Leaking Showers.

Our Leak Free Shower Enclosures guarantee a complete solution to this problem.

All of our Leak Free Shower Enclosures are made to exacting British and European Standards by British craftsmen with decades of experience. We use materials more commonly used in the construction of marine craft. Rugged, strong, long-lasting and beautiful, our products will give you many, many years of trouble-free pleasure, while gracing your home with a luxurious, beautiful piece of Bathroom Furniture.

We deliberately design our products to have the clean lines and clear, uncluttered appearance demanded by the modern bathroom designer. These products are suitable for even the most exclusive of homes.

THE FUTURE OF SHOWERING IS HERE

LEAK FREE LUXURY - FIT IT, FORGET IT

WHAT'S IT MADE OF?

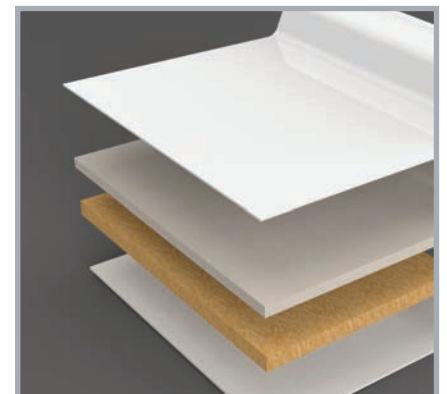

Surface is an Isophthalic, Anti-bacterial Gel.

This gives it excellent physical strength properties, excellent handling characteristics, easy clean, high heat resistance and outstanding corrosion resistance.

Behind the surface coating is a high-end GRP (Glass Reinforced Polymer) of a grade normally only used in Ocean-Going Yachts. This will ensure many, many years of trouble free, water resistant showering.

Behind the GRP is a special Resin Infused Particle Board. This gives the product extra rigidity and strength and allows for the shower doors, valves and additional accessories to be attached directly to the unit without having to go through to the wall behind.

Behind the RIPB is another coating of GRP. This encapsulates the entire unit and makes it impregnable to moisture.

AVAILABLE IN DIFFERENT COLOURS AND EFFECTS

Porcelain White to complement your existing ware and 'never go out of style' **Sandstone Granite** for a luxurious, warm effect. **Black Granite** for a striking, modern finish.

PORCELAIN WHITE

SANDSTONE GRANITE

BLACK GRANITE

The Envirotec Bathing Tray...

is just 50mm in height, making it one of the lowest Leak Free Shower Enclosures in the world today. With it's sleek lines and clutter free interior, it's right up to date and is a contemporary, modern piece of furniture in any luxury bathroom.

Bear in mind that it's also completely logical and functional and you have an unbeatable proposition!

Designed specifically with the modern bathroom in mind

LEAK FREE SHOWER ENCLOSURES

Long term, maintenance free solution Strong and durable

Popular in the US for many years, the concept was designed in recognition of escalating maintenance and repair costs from the more traditional tile and tray method, due to ongoing leaks.

- Simple to install.
One point of responsibility.
No coordinating between carpenter, plasterer, plumber and tiler.
- All units are supplied with adjustable feet to assist levelling.

Also available with optional extended leg kit and matching fascia to allow installation with the waste above ground.

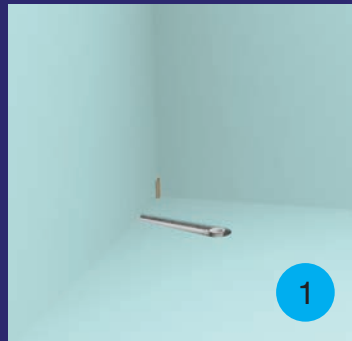

The unit is backed up with marine grade ply to receive screws and fixings, so that shower valve and the riser kit can be fixed directly to the wall of the unit. Concealed valves will require extra space behind the unit.

INSTALLED IN NO TIME..

1. PREPARE THE FLOOR WITH THE WASTE AND THE INLET PIPES
2. ATTACH THE VALVE TO THE UNIT USING OUR FAST FIT BRACKETS
3. MOVE THE UNIT TO THE WALL AND ATTACH PIPEWORK
- 4 ATTACH THE UNIT AND THE SHOWER DOOR

DONE ! NOW ENJOY! A LEAK FREE SHOWER FOR LIFE

Each unit comes with a 90mm, easy clean waste, complete with stylish Chrome Dome, to complement the contemporary appearance, and Flexi Hose for easy installation. They allow 32 litres of water to be carried away per minute. Ideal for power showers.

Cleaning

Envirotec enclosures should be cleaned with non-scratch, non bleach cleaners. Limescale build-up may be quickly removed using a domestic bathroom descaler. The surface is Easy-Clean so regular rinsing with warm water should keep the unit sparkling
